MONSOON ADVISORY

Dear Parents,

Namaste!

Each monsoon season brings an increased risk of Dengue, Malaria, and other infectious diseases. Our collective vulnerability necessitates heightened efforts to ensure our children's safety, particularly during school hours.

To combat this, the steps taken at the school are as follows:

1. Regular fogging of the school's building and gardens is carried out after school hours.
2. Awareness programs regarding the causes, symptoms, and prevention of these diseases during the Circle Time through PowerPoint presentations, and class discussions.

Your cooperation is vital for the success of this campaign, ensuring the well-being of our children.

Parental Advisory:

1. **Proper Attire:** Please ensure your child wears a full-sleeve uniform shirt with trousers/ Tracks.
2. **Insect Repellent:** Apply insect repellent on exposed skin to prevent mosquito bites. Mosquito repellent patches can also be used on the clothing. These patches are an effective way to keep mosquitoes at bay and provide long-lasting protection throughout the day.
3. **Hand Hygiene:** Ensure your child washes their hands thoroughly with soap and water before eating.
4. **Hydration:** Encourage your child to drink plenty of water and fluids before going out in the heat.
5. **Avoid Street Food:** Discourage the consumption of water, milkshakes, fruit juices, chaat, and food from roadside vendors.
6. **Sick Children:** Do not send your child to school if they are unwell.
7. **Preventing Mosquito Breeding:**
 - o Avoid allowing water to collect in open containers, which are ideal mosquito breeding grounds.
 - o Change the water in flower vases daily.

The safety of our children remains our utmost priority. We believe these measures will help keep them safe and healthy during this season.

Thank you for your support and cooperation.

Warm regards

Manisha Malhotra
